DETAILED ACTION

Election/Restrictions

Applicant's election of claims 1-13 in the reply filed on 3/14/05 is acknowledged.

Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 and 12-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Burns (2,443,574). Burns teaches a brazing frame which comprises two brazing bars arranged parallel to each other (Figure 7, item 48) and a plurality of tie rods which connect the brazing bars together (figure 7, item 46); wherein the brazing bars are at a fixed distance b from each other which is capable of corresponds to a width of the block in a compressed condition suitable for brazing (figure 7, item 46); wherein the brazing bars have a height h and a length I which are capable of corresponding correspond to the height H and the length L of the block (figure 7, item 46); wherein the brazing bars have an open profile which opens toward one longitudinal side and which comprises a plurality of openings therein (figure 7, item 46 and 48); wherein the tie

Art Unit: 1725

rods are fixed to the lower longitudinal sides of the brazing bars, and wherein the openings are open toward the upper longitudinal sides of the brazing bars (figure 7, item 46); wherein the openings comprises slots arranged at right angles to the longitudinal side (figure 7, slots); further comprising transverse spars inter-connecting the tie rods (figure 7, item 46 and 48); wherein said openings comprise notches (figure 7, slots); wherein the brazing bars comprise angled profiles having a continuous leg and a leg comprising a plurality of notches (figure 7, item 46 and 48).

Allowable Subject Matter

Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance: The prior art of record does not suggest or teach a an apparatus for brazing a heat exchanger, particularly the claimed compression device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
